PROJECTS

Another-Ball-Game | *HTML | CSS | JavaScript* — December 2021
- This is a single player game between computer and the user. It is hosted on Netlify.
- Updated Scores will be displayed on the screen simultaneously with color flipping feature.
- Github Repository

Berry.io | *Bootstrap | React.js | Material UI | Django* — October 2021
- Berry React is a dashboard template that utilizes the Material-UI framework and the React JavaScript library.
- It offers a range of features and customization options to help you create a powerful and user-friendly admin panel.
- Provides beautiful user interfaces, saves time and cost, well-dosumented and supported. I has various versions and also you can purchase various packages according to your need
- I worked on the front-end and created the demo admin-dashboard template using Material-UI.While working I learned a lot of new things about react like react hooks, react routing
- berrydashboard.io

ABHYAS | *React.js | Node.js | Express.js | MongoDB* — April 2022
- SIH Group Project.
- It is crowd sourcing model for preparing large question banks. Through ABHYAS app students can perform interactive quizzes and it also has a feature of One Click Question Paper generation for teacher. Questions can be divided based on easy, medium and hard level.
- Github Repository
